

# Autonomous Workspace

Providing employees with the flexibility to work from anywhere, on a device that's secure and appropriate for them can significantly increase productivity, however the administrative overhead is often prohibitive. This is where Autonomous Workspace comes in- for a single monthly fee, this solution will provide the hardware, software and services required to ensure users have the right tools to focus on what really matters to your business.

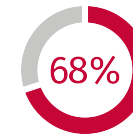

Autonomous Workspace enables true workforce autonomy; with automated provisioning, management and proactive security monitoring, ensuring that your employees are provided with a secure and reliable workspace that is unhindered by location and connectivity that focuses on employee productivity.

Of business leaders plan to create employee experiences comparable to consumer experiences

Companies with great employee experience outperform the S&P 500 by 122%

Of business leaders feel their cybersecurity risks are increasing

## Can your workspace do this?

With Autonomous Workspace we bring together a range of the latest devices and services to deliver a full-lifecycle, modern EUC solution that empowers employees to do their best work, securely, and in a way that suits them. Find out what this solution includes below:

- **Device Lifecycle** - Device subscriptions, break/fix support and advanced hardware security leveraging encryption and biometrics
- **OS Lifecycle** - Evergreen OS, including automated provisioning, intelligent security, automated updates, secure internet access and policy management
- **Application Lifecycle** - Flexible app deployment delivered on-demand, patching including COTS and LOB app updates, licence optimisation
- **Identity & Access Management** - Risk based access, autonomous security decisions, identity lifecycle, dynamic security and password-less identity
- **Data Lifecycle** - Data backup, loss/leak protection, data protection and retention and threat analytics, uncovering threats before they occur
- **User Adoption** - Providing employees with the skills to leverage the suite's features and the AI and ML driven tools- all tailored to the employee's role and skillset
- **Service Insights** - Monitoring to enable data-driven insights, customer dashboards, employee experience and an always-on chatbot assistant
- **Business Capabilities** - Seamless collaboration, self-service orchestration, business analytics, workflow automation, continual strategy review
- **Secure by Design** - Protect against zero-day threats and ransomware, alongside remote-wipe and data protection for non-corporate devices
