

AUTOMATE TO INNOVATE

Whether you're looking to improve your New Starter process or streamline your Order to Cash workflow, automation is key.

Whilst there are many options- from RPA to workflow systems, most of these are either too complicated and require large investments, or aren't able to do everything you need. IA-Connect and Microsoft Power Automate now work together to bring you the solution.

ORGANISATIONS WITH A STANDARD ONBOARDING PROCESS EXPERIENCE
54% GREATER NEW HIRE PRODUCTIVITY - URBANBOUND

SO WHAT ARE THE CHALLENGES?

Power Automate is great for processes which exist entirely in the cloud, interacting with modern cloud-based systems via connectors. However, as we all know, not all processes are that simple.

What about that old, on-premises HR system? What about that bespoke application IT developed for your Finance team or your creaking SAP system that's impossible to get rid of?

OVER 350,000 ORGANISATIONS ARE USING POWER AUTOMATE EACH MONTH AND ARE LAUNCHING MILLIONS OF PROCESSES EVERY DAY - MICROSOFT

WHAT IS MICROSOFT POWER AUTOMATE?

Power Automate is part of Microsoft's wider Power Platform which enables organisations to easily adopt automation and analysis tooling across their systems.

Power Automate simply and securely automates a range of back and front office processes between modern, cloud-based systems to remove highly repetitive and time-consuming manual tasks.

The easy-to-use interface and powerful connectors remove the complexities of automation that are often experienced with other automation and RPA solutions.

60% OF OCCUPATIONS COULD SAVE 30% OF THEIR TIME WITH AUTOMATION - MCKINSEY

WHY ARE HYBRID CLOUD FLOWS IMPORTANT?

Hybrid cloud flows embrace all the great features of Power Automate such as the intuitive user-interface, API-driven automations and cloud-based management, but for on-premises and legacy applications.

By allowing you to interact with your legacy systems from directly within your cloud flows, IA-Connect leverages and enhances your existing investment in skills and experience whilst centralising the management of your automations.

WHAT ABOUT POWER AUTOMATE DESKTOP?

Power Automate Desktop provides on-premises automation capabilities to Power Automate, much like IA-Connect. However, that's where the similarities end. Because of our tight integration, IA-Connect doesn't need you to hand off from one system to another just because your applications happen to sit on-premises or require interface automation.

IA-Connect also brings advanced capabilities including support for Citrix, RDS, Mainframe, Java, SAP and so on. The list of systems we can automate is much more extensive than Power Automate Desktop, and in fact most traditional RPA solutions on the market. And all from the simple Power Automate interface.

MICROSOFT TESTIMONIAL

"Within the space of just a few months, the team at Ultima Labs has built one of the first Intelligent Automation products in the Microsoft space. Their talent, hard work and flexibility is a recipe for success, making them one of the lead partners for automation and RPA in Microsoft Technologies.

I'm excited to continue working with them not only to enhance their IA-Connect product, but also to enable other organizations to achieve more with Microsoft Power Automate."

Ana Demeny, Partner Technical Architect (Power Platform Integration & RPA), Microsoft

HOW DOES IA-CONNECT HELP?

IA-Connect integrates directly with Power Automate to enable you to automate legacy, on-premises applications and those hosted through Citrix or RDS, from directly within your cloud flows, quickly and easily. We call these Hybrid Cloud Flows.

ABOUT ULTIMA LABS

Ultima Labs was founded at the start of 2020 with one mission in mind – to help organisations to adopt automation more easily.

Drawing upon a wealth of experience from professional and managed service consultants, our solutions combine simplicity with deep expertise to ensure IT teams and Managed Service Providers get the most from IT investments, and to enable your teams to focus on what really drives value in your business.
