

# HP WOLF PRO SECURITY SERVICE

The recent pressure on organisations to rapidly transform to ensure business continuity has created a worrying mix of increased cybercriminal activity, reduced visibility for security, and an increasingly distributed workforce working outside the range of IT. A recent global survey of IT decision makers found the below:

**91%**

of IT Teams felt pressure to compromise security if it benefitted business continuity

**83%**

of IT Teams felt enforcing corporate cybersecurity policies is impossible due to blurring of personal & professional lives

**78%**

of IT Teams restricted employee access to websites and applications in attempt to prevent breaches

HP Wolf Security enables cybersecurity teams to deliver user-friendly tools and help to ease restrictions, while also providing defence-in-depth and enhanced protection, privacy, and threat intelligence. HP Wolf Pro Security Service is a multi-layered endpoint security service which defends against cyberattacks without disrupting employee productivity or increasing IT's workload- securing your revenue and reputation, 24/7.

## KEY BENEFITS

### Protection you can trust

Stop known and unknown threats from breaching endpoints with reinforcing layers of proactive protection that use enterprise-grade isolation and advanced Next-Generation Antivirus (NGAV) technologies.

### Endpoint security monitoring

Get comprehensive, worry-free endpoint security management including actionable insights, without the need for in-house expertise – giving IT more time to work on strategic projects.

### Keep employees productive

Empower employee productivity with transparent protection for the applications they prefer, without restrictions or fear of compromising their data, passwords, or network.

HP Wolf Pro Security Service provides invisible layers of protection, allowing you to protect data, devices and employee credentials with reinforcing layers of security monitored by certified HP Security Experts- all without creating barriers to employees' daily productivity and reducing the burden on IT.

## KEY COMPONENTS:

### Advanced deep learning anti-malware protection

Detection of known & unseen threats, static malware protection, cloud-based reputation analysis of files, detection of malware evasion techniques, no signature updates required.

### Real-time threat isolation protection

Email attachment isolation, chat link & file sharing/download protection, protection from documents sent by phishing emails, corporate website whitelisting support for IT.

### Credential theft protection

Prevents credential theft by alerting and blocking users from sharing login details on websites, blocks users entering credentials on malicious sites & warns against sharing credentials on unknown or low-reputation sites.

### Security analytics & reporting

Unified dashboard to view malware prevention & isolated threats, real-time reports including full kill-chain analysis mapped to the MITRE ATT&CK™ framework, direct syslog integration to your existing SIEM.

### Monitored & managed by experts

Ongoing monitoring and analysis of threat event activity and device protection status, guidance on actions associated with prevented threats, centralised policy-based administration and setting management.

## ULTIMA'S HP INC PARTNERSHIP

Ultima has been an HP Inc partner for over 20 years, offering customers a wide range of hardware services and technical expertise. As an HP Amplify Power Partner, we have access to roadmaps and solutions that can provide mobility and improve productivity. Our partner status acts as proof of our ongoing commitment to keep our technical teams up-to-date with the latest product developments, allowing us to give our customers the best and most current advice to make informed decisions about their IT infrastructure.

We've also joined the HP Amplify Impact programme, an industry-first partner assessment, resource and training programme aimed at driving meaningful change across its three Sustainable Impact pillars – Planet, with an emphasis on climate change; People with an emphasis on human rights and social justice; and Community with an emphasis on bridging the digital divide. Through this programme, Ultima will work with HP to assess our own practices while tapping into the HP's extensive investments and initiatives.
