

# Recycling & Site Clearance

**ultima**

For businesses in pursuit of zero waste technology, Ultima can help. Through our partnership with N2S, we provide a disposal service that consistently ensures technology waste is recycled or reused to its maximum potential. We can also offer secure collection bins for your data centre environments, which can be branded and transported to N2S where the data is cleansed and drives destroyed.

Recycling your IT equipment is a great way to boost your green credentials, as 0% goes to landfill - we reuse and resell products where possible. It also helps your organisation with both data and health & safety compliance; plus we supply a complete audit trail to meet government, industry and security legislations.

## Why do I need to recycle?

In January 2014 the EU WEEE compliance scheme became law, meaning disposal of IT and telecoms equipment in the correct manner should be on your priority list.

However, it needn't impact your day - depending on the scope we can collect the equipment, clear a whole site or work with existing partners. We can complete the work out of office hours too, minimising disruption to workplace.

Reduce your carbon footprint and become more environmentally friendly by recycling your devices through our pioneering disposal offering, which includes:

- Printed circuit board recovery
- Precious metal recovery
- Cable recovery
- Cable granulation
- Environmental compliance
- Storage and inventory

The logo for n2s, featuring the letters 'n2s' in a stylized font. The 'n' is blue, the '2' is pink, and the 's' is blue.

# Areas of Strength

- **Green Credentials**  
N2S recycle over 1000 tonnes each year with 0% going to landfill.
- **Corporate Social Responsibility**  
Use of a government-supported initiative to complete the recycling by hand.
- **Full Compliance**  
Ensuring you are fully compliant with the EU WEEE compliance scheme and other governance programmes.
- **Increase Customer Loyalty**  
Boost employee morale and customer loyalty by demonstrating that you're environmentally friendly.
- **Global Responsibility**  
Reduce the impact your business has on the world and it's ever depleting resources - this makes it even more important to support the circular economy.
- **Complete Audit Trail**  
Full end-of-life certificates provided for all items.
- **Avoid the 'Room of Doom'**  
Save space, reduce storage costs and avoid the safety issues that surround redundant data.
