

# Microsoft Azure Site Recovery Ultima Engagements

## Orchestrating Your Disaster Recovery Plan an Issue?

Studies show that 40% of businesses that experience a disaster affecting the integrity of their data or their ability to operate, go out of business within five years. Implementing an appropriate business continuity strategy should therefore be central to IT decision making. As a Microsoft Gold partner for Cloud Platform, Ultima are able to help you define, develop, implement and support such a strategy, incorporating Azure and Site Recovery technologies.

Ultima is only one of a few certified Microsoft partners in the UK qualified to offer end-to-end IT services. Our continued focus is on the provision of quality and complementary technical and strategic services, delivered across each of the following mature practice areas.

## Azure and Site Recovery Engagements

**Azure Everywhere** - We are offering you the opportunity to attend a two day Cloud Value Workshop, followed by a two day Proof of Concept, funded by Microsoft and delivered by Ultima. Our specialists will discuss your business continuity needs and advise on how Site Recovery can help deliver tangible business benefits.

**Cloud Advisory Service** - Based upon a process driven framework that builds upon Microsoft's Core IO model and incorporates the infrastructure lifecycle and our own best practices. These packaged services are designed to address the complexities of evaluating, rationalising, optimising or transforming IT to meet business demands.

**Microsoft Azure Deployment Planning Services** - We can transact Microsoft's DPS tokens, available as part of Software Assurance benefits contained within an Enterprise Agreement, delivering vendor funded 1, 3, 5, 10 and 15 day engagements aimed at helping companies upgrade or migrate to a range of Microsoft Azure-related products.

**Professional Services** - Our data centre practice offers a broad range of solutions and services aimed at supporting clients undertaking migration or modernisation programmes. This includes the implementation and subsequent expansion of private, public and

## What is Azure Site Recovery?

Protect your data centre environment by automating the replication of virtual machines based on policies that you set and control. Microsoft's Azure Site Recovery service can protect Hyper-V, VMware and physical servers, and you can use Azure or your own secondary data centre as your recovery site.

Protect and Recover in Azure

N-Tier Application Consistency

Application Replication Support

No-Impact Recovery Testing

At-Scale Configuration

Low Recovery Point Objective

Data Security and Secure Transmission

Auto Failback and Reverse
